- 3 Tutorial

Philosophy

All contributions to Requests should keep these important rules in mind.

Apache2 License

A large number of open source projects you find today are GPL Licensed. While the GPL has its time and place, it should most certainly not be your go-to license for your next open source project.

Apache2 License

A project that is released as GPL cannot be used in any commercial product without the product itself also being offered as open source.

Apache2 License

The MIT, BSD, ISC, and Apache2 licenses are great alternatives to the GPL that allow your open-source software to be used freely in proprietary, closed-source software.

Apache2 License

Requests is released under terms of Apache2 License.

Requests: HTTP for Humans

Requests is the only Non-GMO HTTP library for Python, safe for human consumption.

Requests: HTTP for Humans

Note

Requests: HTTP for Humans

The use of Python 3 is highly preferred over Python 2. Consider upgrading your applications and infrastructure if you find yourself still using Python 2 in production today. If you are using Python 3, congratulations — you are indeed a person of excellent taste. — Kenneth Reitz

Requests: HTTP for Humans

Behold, the power of Requests:

Requests: HTTP for Humans

```
>>> r = requests.get('https://api.github.com/user', au
>>> r.status_code
200
>>> r.headers['content-type']
'application/json; charset=utf8'
>>> r.encoding
'utf-8'
>>> r.text
u'{"type":"User"...'}
>>> r.json()
{u'private_gists': 419, u'total_private_repos': 77, ..
```

Requests: HTTP for Humans

See similar code, sans Requests.

Requests: HTTP for Humans

Requests allows you to send organic, grass-fed HTTP/1.1 requests, without the need for manual labor. There's no need to manually add query strings to your URLs, or to form-encode your POST data. Keep-alive and HTTP connection pooling are 100% automatic, thanks to urllib3.

User Testimonials

Twitter, Spotify, Microsoft, Amazon, Lyft, BuzzFeed, Reddit, The NSA, Her Majesty's Government, Google, Twilio, Runscope, Mozilla, Heroku, PayPal, NPR, Obama for America, Transifex, Native Instruments, The Washington Post, SoundCloud, Kippt, Sony, and Federal U.S. Institutions that prefer to be unnamed claim to use Requests internally.

User Testimonials

Requests is one of the most downloaded Python packages of all time, pulling in over 13,000,000 downloads every month. All the cool kids are doing it!

Beloved Features

Requests is ready for today's web.

Beloved Features

Requests officially supports Python 2.6–2.7 & 3.4–3.7, and runs great on PyPy.

数据准备

本地 vs. 远程

```
$cat index.html # use type in win32
```

```
<html>
```

```
  <head>
```

```
  </head>
```

```
  <body>
```

```
    <h1>Title</h1>
```

```
    <p> This is a paragraph</p>
```

```
    <table>
```

```
      <tr>
```

```
        <td>A11</td> <td>A12</td> <td>A13</td>
```

```
      </tr>
```

```
      <tr>
```

```
        <td>A21</td> <td>A22</td> <td>A23</td>
```

```
      </tr>
```

```
      <tr>
```

```
        <td>A31</td> <td>A32</td> <td>A33</td>
```

```
      </tr>
```

```
  </body>
```

```
</html>
```

```
$python3 -m http.server
```

```
Serving HTTP on 0.0.0.0 port 8000 (http://0.0.0.0:8000/)
```
