第一个计算机 bug

Combo

格斗对战游戏《街头霸王 II》中采用了连招理念，掌握技巧的玩家可在恰当时间，连续击打电脑玩家，使之没有时间恢复及继续战斗。连招设计属于偶然；主制作人船水纪孝在程序查错时发现了这一情况，他虽然认为时机要求难度很大，难以当作游戏功能，但还是将之作为隐藏设定。此后连招成为格斗游戏的重要设计元素，方法从简单到高难度不一。《超级街头霸王 II》是最早统计连击数，并奖励有达到连击的玩家的¹游戏。

Hidden Features aka Easter Egg

Figure 1: Konami Code

科乐美秘技起因是桥本和久手下一个入为了移植 1985 年射击游戏《宇宙巡航舰》(グラディウス) 的商务用街机版到家庭红白机版时, 而开发了投币式版本, 但这个这个版本很难, 桥本和久也并没有玩多久, 并表示自己也打不过它, 而又因为自己是要使用它的人并且为了确保指令很容易被大家记住, 所以加入了科乐美秘技。原计划是移植完后删除, 而后来因为秘籍浪潮而没删除²。

Why does man print "gimme gimme gimme" at 00:30?

Asked 7 years, 10 months ago Modified 30 days ago Viewed 563k times

2011

gimme gimme gimme

in `stderr`, which wasn't expected. Why are we getting this output?

date man

(a) Test Failure due to man

2672

Dear @colmmaculi, I think that if you type "man" at 0001 hours it should print "gimme gimme gimme". #abba
[@mananet - 3 November 2011](#)

er, that was my fault, I suggested it. Sorry.

Pretty much the whole story is in the commit. The maintainer of man is a good friend of mine, and one day six years ago I jokingly said to him that if you invoke man after midnight it should print "gimme gimme gimme", because of the Abba song called "Gimme gimme gimme a man after midnight".

Well, he did actually [put it in](#). A few people were amused to discover it, and we mostly forgot about it until today.

(b) The Root Cause
